

Unilogon

**Single Sign-On for IP Phones and
Windows Hot Desk**

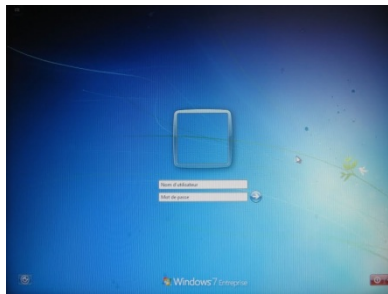

What is Unilogon?

A Single Sign-On solution that automatically and seamlessly logs the user into the closest IP phone when logged into Hot Desk profile.

Plug/start the
computer

Log on to the
windows session

The phone is now
logged in

Unilogon Overview

- Automatically logs the user on to the IP phone with Hot Desk profile.
- Enhances the user experience by making phone use simple, flexible and secure.
- Reduces IT costs and increases user productivity.

Key benefits

Simplicity and Flexibility: Use IP phones seamlessly anywhere in the office, without changing any end user habits

Improve Productivity: Automatic login to IP phones upon Windows login ensures users will never miss a call because they have not logged in.

Reduce costs: By providing users with an 'always ready to call' IP phone, businesses can decrease mobile phone usage in the workspace for cost savings.

Improve security: By eliminating inadequate or nonexistent login PINs, fraudulent phone use and session identity theft are decreased.

Typical use cases

Task workers

Campus workers

Mobile workers

**Mitel
Hot Desk
Users**

Hot Desk Challenges

- Easy passcode or no passcode ?
- Either choice exposes the user data and the company to fraud
- User experience transformation: Why do I need to log in on a phone?
- A portion of the users will forget to log in and out of the phones

Unilogon can help!

Unilogon Compatibilities

Client side

Thin client

Laptop

Desktop
