

RELEASE NOTES

MarWatch R4.8

New Capabilities:

- Windows Service activity monitoring
 - Provides ability to generate an Alarm if a named Windows Service is paused, stopped, crashed, or missing
 - Enables monitoring for Windows services such as Windows Firewall, SQL Server etc.
- Enhanced MarWatch Licensing reporting
 - Provides MarWatch administrator with actionable information on MarWatch Licence usage, including:
 - aged licence expiry list
 - reports on licence inventory
 - application for business analysis
- Alarm thresholding for MCD, MBG and M5000 license utilization.
 - Advance notification of licence consumption changes.
 - Provides VAR with reason to call customer for licence upsale.
- Basic IP device type
 - New device type with Availability monitoring only.
 - Allows monitoring for devices that are not specifically supported by MarWatch.
- MarWatch gadgets viewable in iFrame
 - Allows MarWatch gadget to be inserted into other web page.
 - Enables integration of MarWatch with other customer management systems.
- Licence Enforcement
 - Enables MarWatch system to enforce a range of licensing policies
 - Supports:
 - User-based Licensing
 - Service-tier Licensing
 - Subscription Licensing
 - Perpetual Licensing
 - Trial Licensing

Enhancements:

- Duplicate Device Serial number warning with information on other device
 - Warns if Administrator tries to configure a new device with an existing serial number
 - Shows information for the existing device
- Improved Alarm notes and ticket field editing
 - Automatic saving of changes
- Longer customer notes field
 - Up to 2,000 character for note to installers, etc.
- Longer timeout for MarWatch administration web page
 - Now 60 minutes (was 5 minutes)
- Use Host Resource MIB for system uptime (if available)
 - Works around issue where MCDs show Reboot alarms if system is up for more than 248 days (resolves Known Issue #1387)

Fixes:

- #1496 Links for license reports not available
- #1387 High Up-time MCDs report incorrect uptime, cause false reboot alarms
- #1498 NPE in MBG VQ Commissioning when result != OK
- #1497 RFC1213 SystemInfoTask throwing NPE when target system is down.
- #1494 Adding more than 128 characters in the "Description" field of MCD generates Internal Error
- #1501 Cannot download MarProbe Virtual Appliance from probe page
- #1490 RFC 1213 Storage Collector Fails Constructing URI
- #1489 Disk Usage Threshold not working for Windows server
