

MARTELLO | EDGE Series

Debuting with the EDGE Series, Martello's Elfiq Networks offers LTE/4G/3G cellular connectivity through embedded cellular modems, providing a more reliable failover option. Additionally, the EDGE Series is further compatible with Gigabit links delivered over SFP circuits.

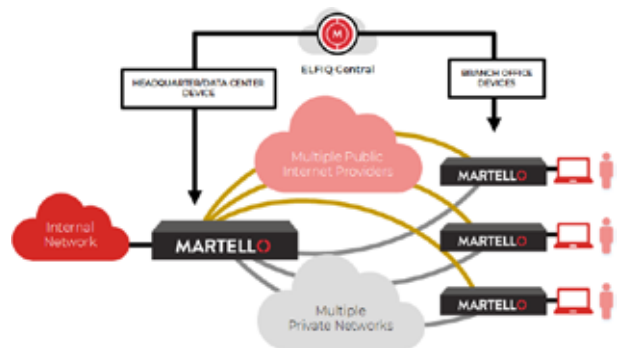

The EDGE Series is compatible with fiber circuits and can be equipped with a cellular modem for unparalleled flexibility and uptime. This is one of the most versatile edge devices out there.

Deployed and managed through Elfiq Central, the company's Cloud-based orchestrator, the EDGE Series can be integrated seamlessly in any client environment, guaranteeing a fast return on investment. By leveraging Elfiq Central's zero-touch provisioning capabilities, end-users can monitor and maintain a powerful SD-WAN without having to break the bank.

The EDGE Series, along with the CORE Series, are dedicated solely to Martello's SD-WAN solution, and is designed to address multiple issues facing branch offices around the world. The new devices offers multiple different packages, with a focus on user experience at the branch, quality of experience, VPN acceleration and security.

- > Compatible with SFP links
- > Equipped with two bypasses
- > Embedded cellular modem (LTE/4G/3G)
- > Zero-touch provisioning via Elfiq Central

A MODULAR APPROACH

Elfiq Central provides unprecedented visibility over your network's health while distributing decision making intelligence across all paths. With Zero-Touch Provisioning capabilities, centralized license and firmware management and live site health reports, Elfiq Central allows users to control all their Elfiq Networks devices, whether they're deployed physically on site, in virtual environments or in the Cloud.

There are several options for SD-WAN deployments. With ATLAS, clients can choose between two platforms and three licenses to tailor a solution to their network needs. Additional Licenses are available to increase performance.

*For deployment over 1000 sites, we recommend that you talk with our network architecture team.

About Martello

Founded in 2009, Martello Technologies is headquartered in Ottawa, Canada with staff in Canada, the United States and France. In January of 2018, Martello merged with SD-WAN player Elfiq Networks to offer a solution that pairs performance management software with SD-WAN technology to provide stellar UC performance. Martello's solutions deliver confidence in the performance of real-time services on cloud and enterprise networks and is a proven provider of performance management software for Mitel customers.

Elfiq Networks is a subsidiary of Martello Technologies
