

# MARTELLO | Network Health Test

## Test Unified Communication Performance

Reliable network performance is difficult and costly to achieve. Know what's causing a problem on your VoIP network quickly with agent-based network testing. Martello Vantage offers continuous network health testing for SIP and voice performance.

### Network Health Test Features

- Specialized for voice and video
- Agent-based synthetic testing on a SaaS platform
- Run scheduled and on-demand synthetic call tests to quickly pinpoint performance problems with diagnostic tools customized to voice and video
- Test results point you towards specific, actionable problems with alerts for anomalies

### Network Health Test Types

- SIP call test between 2 agents
- SIP registration test from an agent to a SIP registrar
- External call test from an agent to an outside location
