

Delivering Reliable UC Network Performance

With Martello Vantage, network operators can easily, from a single dashboard, support digital transformation by keeping networks and infrastructure running optimally.

UC Score  
Network  
Assessment

**UCScore** is a simple, web-based assessment tool that confirms a network's fitness for a UC deployment.

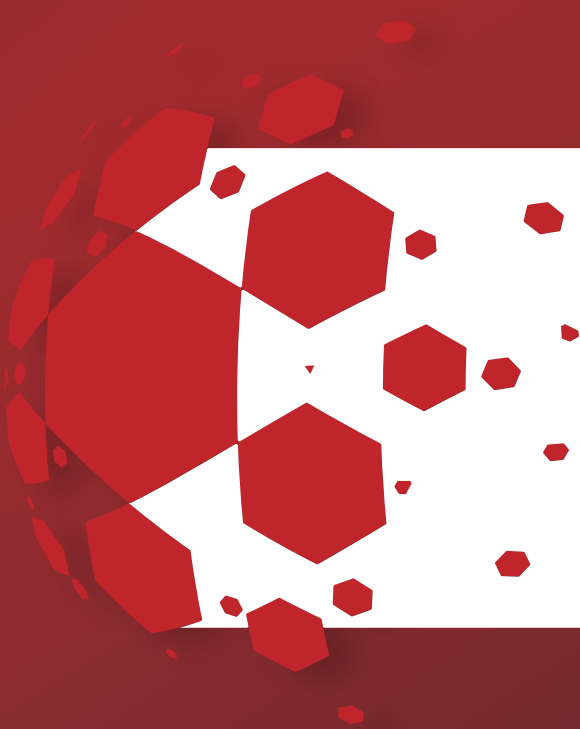

Network  
Health Test

Know what's causing a problem on your VoIP network quickly with **agent-based network testing**.

Network  
Performance  
Management

Delivers alerts and reports on **VoIP performance** metrics, while monitoring the entire network infrastructure.

SD-WAN  
Solutions

**SD-WAN Solutions** help you build a scalable, flexible and affordable network infrastructure.

*SD-WAN is Important for UC*

**SD-WAN can transform a poor performing UC deployment into a stellar one. Poor UC performance (dropped calls, delay) is often caused by a network infrastructure not designed for high bandwidth applications.**

## HOW

- Proactively manage and optimize bandwidth through multiple ISP/WAN links.
- Automate QoS to prioritize voice/UC

## WHY

- Diversity – reduce dependency on a single network or carrier
- Reduce downtime risk
- Pay less for bandwidth
- Simplicity – centrally manage policies and easily deploy them across your organization
