# GAME CHANGING SD-WAN

## NETWORK TECHNOLOGY

With the increasing demands put on enterprise networks, organizations are looking to simplify their network infrastructure without sacrificing performance or security. Martello's SD-WAN offers a game changing solution to create a robust network while lowering your connectivity bill.

Martello's SD-WAN solutions are right for every network. Our drop-in design takes the headache out of integration, giving you a high-performance network that is scalable and affordable.

### LOWER COST OF OWNERSHIP

Thanks to its Layer-2 design, Martello's solution can deliver better performance for less, guaranteeing a higher return on investment and a lower total cost of ownership. Save on bandwidth cost, redundant maintenance fees and avoid productivity losses.

### ZERO-TOUCH PROVISIONING

Get your network up and running in as fast as 10 minutes.

### TRANSPARENT INSTALLATION

Martello products are invisible to attackers and can integrate seamlessly in any network without requiring any reconfiguration to your pre-existing security environment.

### SMARTER PATH SELECTION

Turn the complexity of bandwidth and connectivity management from multiple carriers into a competitive advantage.

*"Our guests consider high speed internet access among the most critical amenities we offer. We chose Martello's enterprise network solutions to ensure continuity of high-speed internet access in case of planned or unplanned failures, and the solution has delivered on its promise for more than 7 years".*

Mandarin Oriental Kuala Lumpur

## ENTERPRISE NETWORKS

Delivering and controlling network and application performance go hand in hand. By deploying the right appliances at the edge of the network, as well as within your core, or in your cloud environment it becomes easier to:

• Deliver stellar application performance
• Monitor and inspect the network to identify and prevent issues
• Act immediately to resolve issues before any SLA is breached

## SERVICE PROVIDERS

No matter which services your organization provides to clients, Martello has a set of solutions to help you improve user experience. There are many ways you can use your infrastructure to expand your business and deliver more value:

• Simpler and faster deployment thanks to the solution's innovative Layer-2 design
• Blazing fast failover and path selection decisions
• Capture additional recurring revenue by

Martello makes it easier for organizations to finally move away from overbearing connectivity contracts and capitalize on carrier diversity, gaining resilience and performance while reducing the cost of bandwidth.

*"The [Martello] team walked us through concepts, architecture, and they even helped us set up our new appliance. When the cutover date came, we literally had less than 10 minutes of down time,"*

Indian Prairie School District 204

## FLEXIBLE, SECURE SOLUTIONS THAT FIT YOUR NETWORK

- REDUCE NETWORK COSTS

- FASTER, DYNAMIC FAILOVER

- ENHANCED APPLICATION PERFORMANCE

- SEAMLESS, SECURE INSTALLATION

## COMPATIBILITY WITH THE EMERGING 5G STANDARD

**Martello is the first SD-WAN vendor in Canada to complete the initial phase of testing on the ENCQOR 5G testbed.**

## GET A HEAD START ON THE FUTURE

Organizations can get a head start on 5G adoption by incorporating SD-WAN into their exisiting infrastructure.

With analysts predicting more than 100 million 5G-enabled handsets will be sold in 2021*, it's not too soon to start.
