

MARTELLO | Powering Network Performance

The Command Center of Your IT Environment

Martello helps IT teams reduce alert noise and control their IT environment. We automatically organize IT data from any source into service oriented dashboards, speeding up root cause analysis and improving service delivery.

DASHBOARDS FOR ALL YOUR IT DATA

Visualize all your IT data on personalized dashboards and diagrams. From high-level dashboards to detailed performance trends, iQ enables you to visualize all your IT data in a user-friendly format.

SINGLE PANE OF GLASS

All your existing monitoring, cloud, and service management tools integrate with iQ, providing an overview of all your data. Track your applications across different domains and control their live status through a smart layer that sits on top of your IT environment.

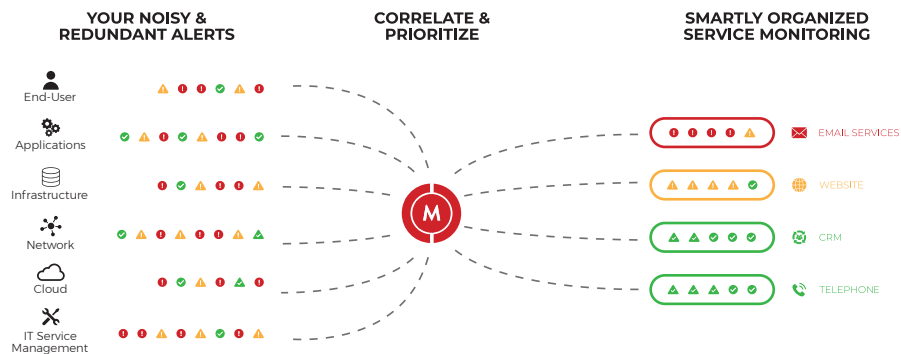

SERVICE MODELING & APPLICATION MAPPING

Automatically import all the mapping and groups from your monitoring and service management tools. Immediately assess which services and applications are available and quickly drill down to the root cause if a service is affected.

FUTURE-PROOF YOUR IT OPERATIONS

If you decide to add or replace an IT tool, you can connect it to iQ and enjoy the same features and benefits.
